

Résultats expérimentaux

Implémentation dans la librairie RevoLUT¹

Table 3.4 Temps d'exécution (en secondes) de l'assignation aveugle

(p, M, N)	n	(Trama <i>et al.</i> , 2025)	Blind Tensor Assign
(16, 1, 2)	16	10.832	0.08
(16, 2, 2)	256	173.312	1.24
(16, 3, 2)	4096	2, 772.992	20.28

Temps estimé par Trama selon la formule $n \times (0.088 + 2 \times 0.159 + 0.271)$
pour assigner n entiers 8 bits encodés comme deux chiffres de 4 bits
